UNAIDS to release new Global AIDS Epidemic Update report for World AIDS Day

Global Number of People Living with HIV Reaches Highest Level Ever

UNAIDS will present data from the new UNAIDS report, *AIDS epidemic Update 2004*, highlighting the global and regional estimates on AIDS and new trends in the epidemic's evolution. There will be a special focus on women, girls, HIV and AIDS — the theme of the World AIDS Campaign 2004 (including World AIDS Day – 1 December).

Participants will discuss key findings of the new report including:

- Prevention programmes urgently needed for women and girls to slow spread of AIDS
- The number of women living with HIV has risen in every region over past two years
- Diverse epidemics are underway in various regions, some still in early stages
- Epidemics growing rapidly in Eastern Europe, Central Asia and East Asia—mainly driven by injection drug use and unsafe sex
