

The following 6 modules have been designed to provide practical, easy-to-use, gender sensitive tools for the HIV/AIDS development worker, community leader, and advocate. This collection of 6 modules can be used together or individually.

### **Gender Sensitivity Checklist:**

*This checklist is a tool to assess the sensitivity of HIV/AIDS prevention programmes and policies to the needs of women, men, girls, and boys.*

### **Best Practices/Programmes that Work:**

*This module provides a list of best practices principles, which draw on and synthesise the elements of successful HIV/AIDS prevention programmes. This module also contains examples of effective HIV/AIDS prevention programmes that include gender specific components.*

### **Integrating HIV/AIDS Components into Existing Gender-Based Health Programmes:**

*This module provides a practical guideline for integrating HIV/AIDS components into existing gender-based health programmes. The module also provides examples of successful integration.*

### **Integrating Gender Components into Existing HIV/AIDS Prevention Programmes:**

*This module provides a practical guideline for integrating gender components into existing HIV/AIDS-based prevention programmes. This module also provides examples of successful integration.*

### **Communicating the Message:**

*This module outlines ten strategies for effectively disseminating gender-sensitive HIV/AIDS information to a variety of audiences.*

### **Presentation Graphics:**

*Building on the Fact Sheets and the Almanac, this set of presentational graphics illustrate the status of HIV/AIDS and the role gender plays in its transmission and prevention. This module can be used to deliver and disseminate a set of coherent and unified messages on HIV/AIDS and gender.*
