

**UNAIDS/WHO HIV/AIDS Regional Estimates as of end 2002
(AIDS Epidemic Update: December 2002)**

Estimated number living with HIV/AIDS during 2002	Adults & Children	Adults (15-49)	Children (<15)	% of HIV-positive adults who are women	Adult (15-49) prevalence rate (%)
sub-Saharan Africa	29,400,000	26,500,000	2,800,000	58%	8.8%
East Asia & Pacific	1,200,000	1,200,000	4,000	24%	0.1%
Australia New Zealand	15,000	15,000	<200	7%	0.1%
South & South East Asia	6,000,000	5,800,000	240,000	36%	0.6%
Eastern Europe & Central Asia	1,200,000	1,200,000	16,000	27%	0.6%
Western Europe	570,000	560,000	5,000	25%	0.3%
North Africa & Mid East	550,000	510,000	40,000	55%	0.3%
North America	980,000	970,000	10,000	20%	0.6%
Caribbean	440,000	420,000	20,000	50%	2.4%
Latin America	1,500,000	1,500,000	45,000	30%	0.6%
TOTAL	42,000,000	38,600,000	3,200,000	50%	1.2%

Estimated number of new HIV infections during 2002	Adults & Children	Adults (15-49)	Children (<15)
sub-Saharan Africa	3,500,000	2,700,000	720,000
East Asia & Pacific	270,000	270,000	3,000
Australia New Zealand	500	500	<100
South & South East Asia	700,000	640,000	60,000
Eastern Europe & Central Asia	250,000	250,000	1,000
Western Europe	30,000	30,000	<500
North Africa & Mid East	83,000	70,000	13,000
North America	45,000	45,000	<500
Caribbean	60,000	50,000	7,000
Latin America	150,000	140,000	10,000
TOTAL	5,000,000	4,200,000	800,000

Estimated deaths from HIV/AIDS during 2002	Adults & Children	Adults (15-49)	Children (<15)
sub-Saharan Africa	2,400,000	1,800,000	550,000
East Asia & Pacific	45,000	43,000	2,000
Australia New Zealand	<100	<100	<100
South & South East Asia	440,000	400,000	43,000
Eastern Europe & Central Asia	25,000	25,000	<100
Western Europe	8,000	8,000	<100
North Africa & Mid East	37,000	30,000	6,800
North America	15,000	15,000	<100
Caribbean	42,000	35,000	7,000
Latin America	60,000	55,000	5,000
TOTAL	3,100,000	2,500,000	610,000
